

EARTHWISE EDUCATION

Experiential Learning | Sustainable Practices | Community Wellness

The **Earthwise Education Program** promotes environmental sustainability through school programs focused on food waste reduction, composting, and connecting students with eco-friendly practices in nutrition and agriculture.

Our initiative focuses on empowering more than 80 schools throughout all four Counties within District 5240 through environmental sustainability programs.

The program integrates new cafeteria technologies and garden enhancements to educate students on reducing food waste and conserving water, fostering hands-on learning in environmental stewardship and sustainable practices.

Your support, through cash or DDF contributions, will help make a significant impact in the 2024/25 academic year. Let's cultivate eco-awareness and sustainable habits in the leaders of tomorrow!

Grant Highlights & Impact

- **Areas of Focus** - Protecting the Environment, Supporting Education, Fighting Disease
- **Community Partnerships** - Bringing together Rotary, Our Schools, Nonprofits, and local businesses
- **School Programs** - Reaching more than 80 schools throughout all four Counties within District 5240
- **Innovative Technology** - Introducing new technologies into the school cafeterias to significantly decrease food waste while creating new composting solutions for each school garden
- **Community Awareness Programs**
